NEXT GENERATION SEALANT TECHNOLOGY

GenX is the next generation of sealant technology. The high performance advanced polymer sealant offers maximum durability for use in many interior or exterior conditions. The product's flex technology allows for ±50% joint movement, providing a flexible, durable bond.

GenX is designed for interior/exterior use for sealing around windows, doors and siding. It bonds to a variety of materials, including fiber cement, cedar, brick, stone, coated aluminum, steel, fiberglass, vinyl, PVC, stucco, EIFS, wood, glass, concrete, masonry, flashing tapes and Kynar® coatings.
